GOKUL B

UX/UI | PRODUCT DESIGNER

+91 96003 01159 | gokulb020@gmail.com

PORTFOLIO | LINKEDIN

PROFILE

I approach product design by understanding user needs, structuring complex information, and translating problems into clear, usable digital experiences. I work across research synthesis, user flows, wireframing, prototyping, and interface design in Figma. My technical support experience also helps me understand real customer problems and communicate practical solutions. I use AI selectively for research organization and repetitive tasks, while keeping design decisions grounded in user needs.

CORE SKILLS

UX DESIGN: User research, requirement analysis, personas, information architecture, user flows, wireframing, usability-focused iteration

UI & PROTOTYPING: High-fidelity UI, interactive prototypes, responsive design fundamentals, typography, visual hierarchy, layout and composition

DESIGN SYSTEMS & HANDOFF: Figma components and styles, reusable patterns, design consistency, feedback-led refinement, developer handoff awareness

AI-ASSISTED WORKFLOW: Brainstorming, organizing research insights, content structuring, repetitive task assistance, human-reviewed outputs

TOOLS & FRONTEND: Figma, Adobe Photoshop, Illustrator, InDesign, Adobe XD, Framer, HTML, CSS, Bootstrap (basic)

EXPERIENCE

Freelance Graphic Designer | Independent

- Translate project briefs into visual directions, page structures, user flows, and interface concepts suited to the intended audience.
- Develop brand assets including logos, business cards, posters, letterheads, ID cards, signboards, and other marketing materials.
- Refine layouts and visual details based on project goals and feedback, keeping designs clear and practical to implement.

Senior Technician / Working Partner | Eagle Zone Computer Service Centre | 2023 to Sep-2026

- Troubleshot computer and laptop hardware and software issues, helping customers understand problems and suitable solutions.
- Support custom PC builds, laptop and printer services, and technology requirements for individual and business customers.
- Use customer conversations to identify needs, explain technical options, and guide users through practical next steps.

SELECTED PROJECTS

Paw Train | Mobile Pet Training App

- Reviewed 5+ survey responses and used the findings to shape personas, information architecture, and user flows for pet owners and trainers.
- Designed wireframes and high-fidelity Figma screens for pet profiles, training progress, community, trainer dashboards, and session scheduling.
- Structured key journeys to make training activities, progress, and trainer interactions easier to navigate.

Figma Plugin Concept | Color VS / Canvas Variable Builder

- Explored a plugin concept for converting canvas colours and typography into structured Figma Variables and Styles to support more consistent design-system setup.

EDUCATION

Certification in UI/UX and Graphic Design | FrameBox2.0, Peelamedu

Bachelor of Computer Applications (BCA) | Sri Krishna Adithya College of Arts and Science, Coimbatore | Jun 2024
